

DOE/AE Forum | *Werner Betzenbichler* | 25 Nov 2019

EB-105

Relations with Designated Operational and Applicant Entities

Topics

- **Synthesis report of the annual activity reports (Annex 3 to AA)**
- **DOE Calibration workshop in Seoul from 24 to 25 October 2019**

Synthesis report of the annual activity reports

In fact, some really good news

- Slight increase on demand on DOE services by the CDM
- Predominately a creation of profits
- Stop of withdrawals of accreditation
- Many (unused or rarely used) resources are still in the records

Nonetheless future development depends on external factors

- Use of CDM by other schemes
- Conversion of CDM to Art 6.4 activities

Synthesis report of the annual activity reports

Clarification Request regarding figure 3 page 14

- Ranking is dominated by “Inclusions of CPAs”
- Are figures based on amount of CPAs or “inclusion actions”?

DOE Calibration workshop

- Thanks for support received by UNFCCC secretariat enabling Forum Chair to attend
- Thanks for excellent organisation and preparation, in particular of exercises
- Repetition should be considered on annual basis
- Some differences in capabilities and capacities have been recognized
- Invitation should directly address those who are responsible for internal qualification measures
- Assessment team should focus on the distribution of knowledge which have been in the focus of the workshop at the following central-office assessments → additional incentive for participation

Thank you for your attention!

Werner Betzenbichler
Chair of the DOE/AIE Forum
