

DNA Forum Interaction at EB 103

13 June 2019
Bonn, Germany

Aim of the presentation

- The aim of the presentation is to:
 - give a good picture on how the DNAs see the current situation of the CDM, the envisaged roles of the DNAs in the post-Paris world and the future of the market mechanisms;
 - deliver suggestions to the Board on what work they could do to address the concerns/suggestions of the DNAs;
 - present Co-chairs' takeaway from the global DNA Forum meeting 2019;
 - receive feedback from the Board.

DNA inputs to EB 103 (1/2)

DNAs met for a physical meeting in Bonn in parallel with the EB 103 meeting, exchanged views with the Chair and Vice-Chair of the Board, and provided input to the Board.

Following were the guiding questions for the session:

- a) How could the Board further support stakeholders to ease barriers of the CDM, including enhancing regional distribution?
- b) How could the Board further increase attractiveness of the CDM and hence increase the use of it?
- c) How could further knowledge sharing among DNAs be facilitated?

DNA inputs to EB 103 at a glance (2/2)

CDM – the present

- Although demand has fallen in recent years, CDM is still a functioning tool which continues to attract interest;
- DNAs expressed concern about the current prices of CERs – as well as the lack of long-term predictability;
- Some DNAs questioned whether existing projects may be transferred to other funds, e.g. Green Climate Fund;
- With regard to the Board's current work on reviewing the methodological approach in response to CMP 14 mandate, there was a request to the Board to consider adopting IPCC default value for cookstove methodologies.

CDM – the future

- DNAs requested clarity on the future of the CDM. Ongoing uncertainty is affecting:
 - Existing projects within jurisdictions – it is difficult for DNAs to encourage project participants to continue projects;
 - Clarity on the role of the DNAs under the market structures established by Article 6;

Co-chair's take away from the DNA Forum meeting 2019 (1/2)

- DNAs remain engaged in carbon market development and are eager for clarity on the future of the CDM.
- The RCCs are doing valuable work in capacity building and knowledge sharing among DNAs – the Board should further strengthen its support to RCCs and local and regional DNA activities.
- Requested to allow DNAs to attend regional events (e.g. regional climate weeks), through allocating more funds in the CDM Management Plan.
- DNAs are grateful for the opportunity provided by the Forum –thanks to the CDM EB for its continued support.

Global DNA Forum Meeting 2019 venue in Bonn

Co-chair's take away from the DNA Forum meeting 2019 (2/2)

Contd.:

- Elections of the new Co-Chairs and Alternate Members for the DNA Forum Chairing Committee 2020 took place.
- A survey to receive specific feedback from participating DNAs on this year's forum meeting was launched.
